

# Bridge the AI Gap in Manufacturing

November 4-5 | Rite-Hite Headquarters | Milwaukee, WI

The [Bridge the AI Gap in Manufacturing Conference](#) brings together manufacturing leaders, technology experts and practitioners to explore what it takes to cut through the hype to address the operational realities of deployment across legacy systems, workforce culture, data infrastructure, and capital allocation.

## Why Attend?

Gain practical insights into moving AI from pilots to scalable results. Hear real-world use cases, explore strategies for data, systems and workforce readiness, and learn how manufacturers are evaluating AI investments and measuring impact.

Plus, attendees will gain direct access to other manufacturing leaders navigating AI deployment strategies to gain peer-tested benchmarks.

## Support Your Organization's AI Goals

Build your team's knowledge and confidence around AI with a community of peers and experts on a similar journey to modernize manufacturing with digital technology, AI-enabled solutions, and cutting-edge automation.

Benchmark your operations against industry leaders to avoid costly pitfalls, streamline decision-making, and accelerate your digital transformation timeline.
